Dynamic Material Bank (DMB)

At a Glance

Dynamic material bank (DMB) - is the first output of the TOO4TO project - with the main aim to review the most recent and relevant materials devoted to sustainability that are applicable in an organizational context in the EU and beyond and create dynamic (updateable) open access database (bank) of various information references (materials). All materials available on open access providing opportunities for everyone having access to the Internet to reach and use the materials for learning purposes.

Dynamic Material Bank (DMB)

The database is based on seven Sustainability Areas...

Basics of Sustainability and **Sustainable Management**

Artificial Intelligence and Sustainability

Circular Economy, Economics & Sustainability, Sustainable Production

Climate Change and Sustainability

Corporate Social and **Environmental** Responsibility

Management

Sustainable Energy Solutions

It can be filtered by **Sustainable Development Goals...**

...or by various forms of information (Categories):

> Regulations, policies (EU and global)

Scientific articles and other scientific publications

> Reports (global, regional, national or industry level)

Best practice examples from industry

> Software and other tools

International research projects (results)

Updates, insights from the business organizations

Lets develop the Dynamic Material **Bank together** using Add Entry function!
